Education

2021–2023 **PhD in mathematical physics**, *Rheinische Friedrich-Wilhelms-Universität*, Bonn

- Thesis: *On the Numerical Computation of Modular Forms*, Grade: Magna Cum Laude (very good) [Link]
- Development of numerical algorithms with applications in number theory [Code] (Python, Cython, C)
- Creation of databases for special mathematical objects [Code1, Code2] (Python)

2018–2020 **M. Sc. in physics**, *Rheinische Friedrich-Wilhelms-Universität*, Bonn, *Grade: 1.4*

- Thesis: *Computing Laplacian Eigenvalues at Arbitrary Precision Arithmetic*, Grade: 1.0 (very good)
- Distinguished with the Bonn-Cologne Graduate School (BCGS) Honors Branch scholarship for excellent academic achievements

2015–2018 **B. Sc. in physics**, *Rheinische Friedrich-Wilhelms-Universität*, Bonn, *Grade: 1.7*

- Thesis: *Laplacian eigenvalues of regular polygons and their relation to multiple zeta values*, Grade: 1.0 (very good)

Professional Experience

2023–current **Data Scientist / Research Scientist**, *Fraunhofer IAIS*, Sankt Augustin

Doing research and industry work in the fields of natural language processing and dynamical stochastic systems.
Projects:

- Development of an LLM that is fine-tuned for german legal tasks
- Automated email order processing for a client using LLMs
- Client acquisition talks with various companies and general consulting on workflow optimization using AI

2019–2023 **IT Research Assistant**, *Physikalisches Institut*, Bonn

Work in the IT department.
Projects:

- Conception, planning and development of new room-booking and event-management software based on Indico
- Automated installation and maintenance of windows and macOS machines
- Evaluation and documentation of various software

2018–2019 **Student Assistant**, *Physikalisches Institut*, Bonn

Shift work as a stud. operator at the ELSA particle accelerator

2016–2019 **Startup Founder**, *Ems und Berghaus App-Entwicklung GbR*, Bonn
Development of a social media app for finding nearby events

- Project lead and supervision of freelance designers and developers
- Conception
- Development of the first version in android

Selected Publications

- *Foundation Inference Models for Markov Jump Processes* (with K. Cvejoski, P. Seifner, C. Ojeda, R. Sanchez), NeurIPS, 2024
- *Computation of Laplacian eigenvalues of two-dimensional shapes with dihedral symmetry* (with R.S. Jones, H. Monien and D. Radchenko), Advances in Computational Mathematics, 2022
- *On the computation of modular forms on noncongruence subgroups* (with H. Monien and D. Radchenko), Mathematics of Computation, 2022
- *On Dirichlet eigenvalues of regular polygons* (with B. Georgiev, H. Monien and D. Radchenko), Journal of Mathematical Analysis and Applications, 2021
- For a complete list, see [Google Scholar]

Technical Knowledge

Python	Advanced	**Julia**	Advanced
Cython	Advanced	**C/C++**	Basic knowledge
Git/GitHub	Advanced	**LaTeX**	Basic knowledge
Linux	Basic knowledge	**Windows**	Basic knowledge

Languages

German	Native	**English**	Fluent
French	Basic knowledge		

Certificates

Coursera	Deep Learning Specialization	Coursera	DeepLearning.AI TensorFlow Developer Specialization
Coursera	Introduction to Machine Learning in Production	Coursera	Applied Machine Learning in Python
